

Bank Management System Project Use Case Diagram

Here are the diagrams with discussion of **Bank Management System Project Use Case Diagram** using **Include** and **Extend** 2021.

1. General Use Case

Now I present to you the general use case of the Bank Management System. This diagram shows the general processes or function that the system could do that is based on the transactions done by the Bank admin in managing the customers' information and status.

BANK MANAGEMENT SYSTEM

USE CASE DIAGRAM

General use case is the most common application of a use case diagram. The use case

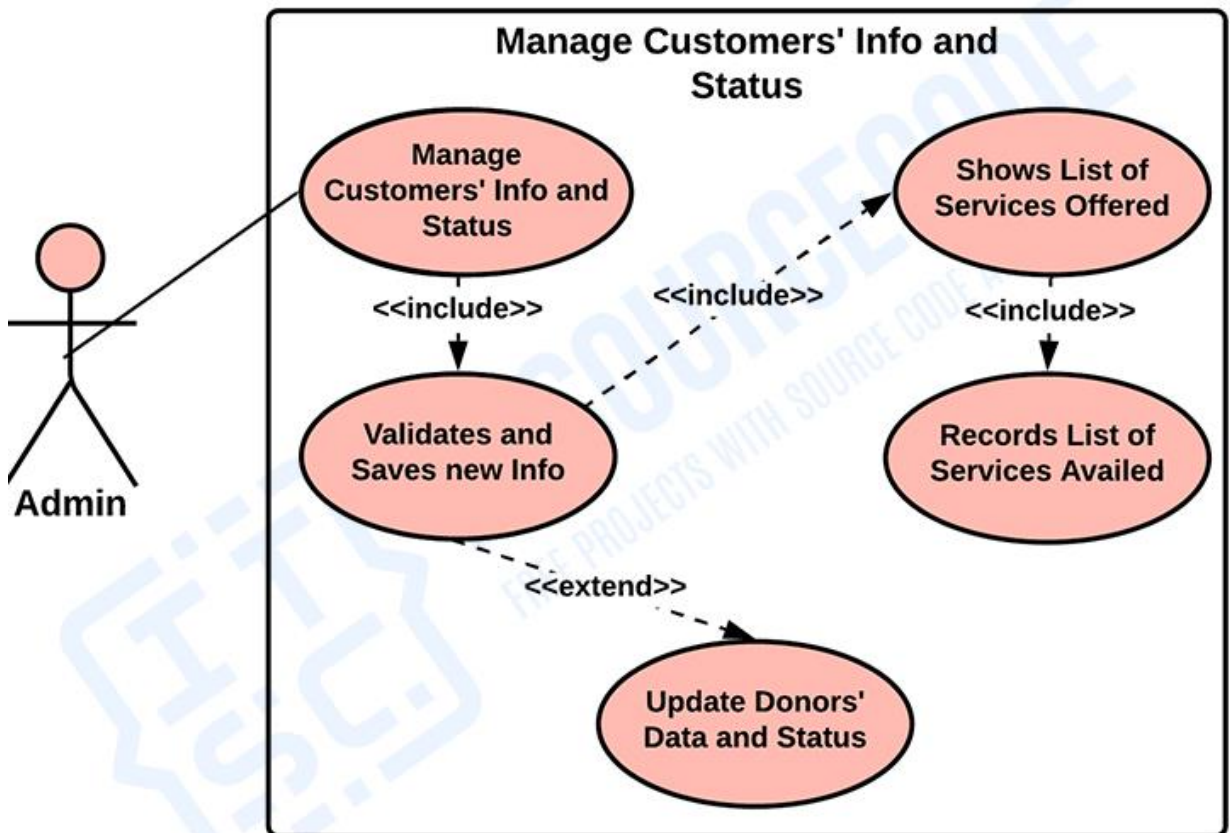

diagrams depict the system's main components as well as the flow of information between them.

With the help of this general use case, the programmer will have the basis on what could be put into consideration in creating the Bank management system.

2. Monitor and Manage Customers' Information and Status

This is where the Bank admin manages the important information of the customers that will serve as basis during a student process a transaction and update their status.

BANK MANAGEMENT SYSTEM

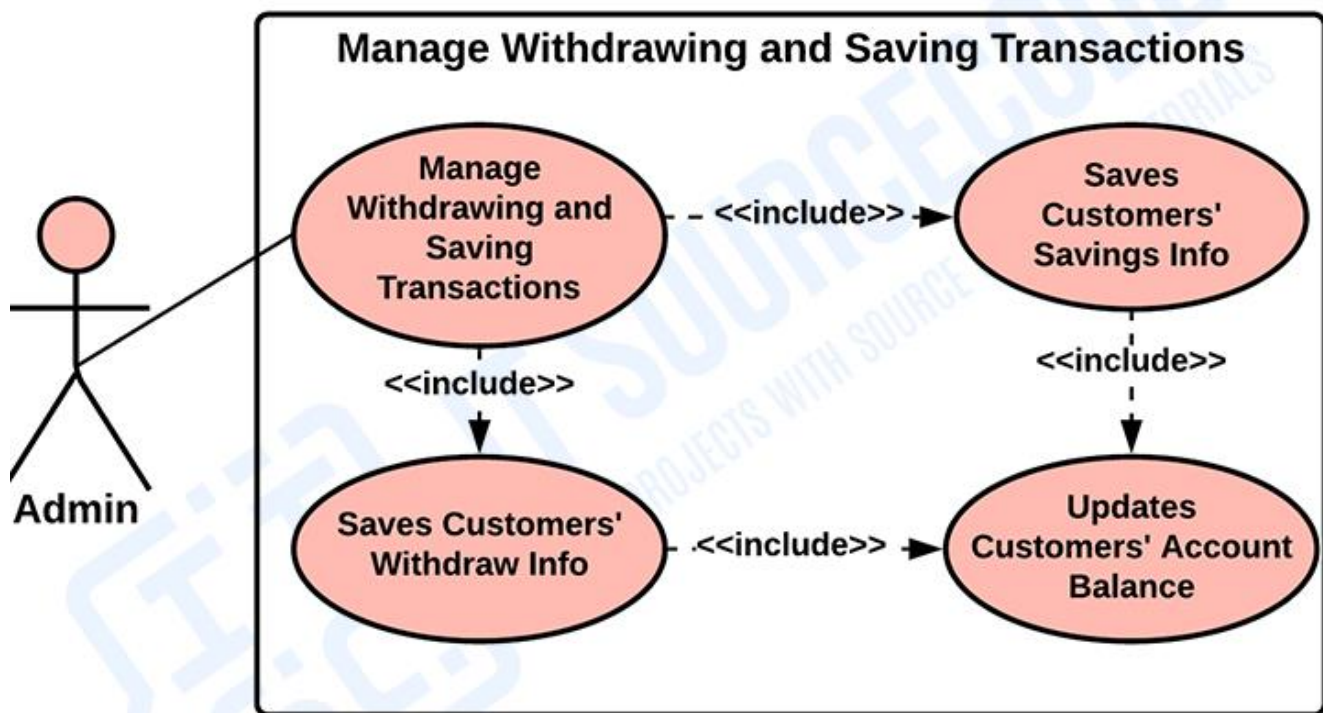

USE CASE DIAGRAM

As you can see the customers' information should be encoded to the system. The system then will monitor its details to validate it and then saves the data.

3. Manage and Update Account Applicants' Information

This process is where the bank admin or employees encodes and validates the applicant to have them access their bank account services. They will update the applicants' information as soon as the applicant provided the requirements to be an account holder.
