

How to install python

- Go to the official Python website:
 - Python Downloads for Windows
 - · Click the latest Python 3.x installer (for most users, choose Windows installer (64-bit)).
 - Run the downloaded installer.
 - Important: Check the box:
 - · Add Python to PATH
 - · · Click Install Now.
 - After installation, open Command Prompt and verify:
 - · `python --version`
 - or
 - `py --version`
 - You should see something like:
